L13 ANSWER 3 OF 27 CAPLUS COPYRIGHT 2002 ACS  
AB Disclosed is a solid dispersed prepn. for poorly water-sol. drugs, which  
is prepd. by dissolving or dispersing the poorly water-sol. drugs in an  
oil, a fatty acid or a mixt. thereof, mixing the soln. or dispersion in a  
water-sol. polyol matrix and **drying** the mixt. The solid

dispersed prepn. can be formulated into a power formulation a granule formulation. The solid dispersed prepn. is improved in the soly. of poorly water-sol. drugs in the gastro-intestinal tract, resulting in a great increase in the bioavailability of the drugs. In addn., the solid dispersed prepn. gives the pharmaceutical solns. to the problems that the conventional semi-solid or liq. prepn. possess, enabling medicinally effective, poorly water-sol. compds. to be formulated, molded and processed, quickly and in an economically favorable manner without use of any org. solvent. Examples are given for emulsions contg. mixts. of waxes, oils, and aq. phase.

The P indicator for Preparations was not generated for all of the  
CAS Registry Numbers that were added to the H/Z/CA/CAPLUS files between  
12/27/01 and 1/23/02. Use of the P indicator in online and SDI searches  
during this period, either directly appended to a CAS Registry Number  
or by qualifying an L-number with /P, may have yielded incomplete results.  
As of 1/23/02, the situation has been resolved. Also, note that searches  
conducted using the PREP role indicator were not affected.

Customers running searches and/or SDIs in the H/Z/CA/CAPLUS files  
incorporating CAS Registry Numbers with the P indicator between 12/27/01  
and 1/23/02, are encouraged to re-run these strategies. Contact the  
CAS Help Desk at 1-800-848-6533 in North America or 1-614-447-3698,  
worldwide, or send an e-mail to [help@cas.org](mailto:help@cas.org) for further assistance or to  
receive a credit for any duplicate searches.
